¹A public library is an administrative entity, the agency that is legally established under local or state law to provide public library service to the population of a local jurisdiction. The administrative entity may have a single public library service outlet, or it may have more than one outlet. The types of administrative structures for public libraries are reported in Table 2. See Table 3 for additional information on outlets.

²The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives revenue, plus any areas served under contract for which the library is the primary service provider. The determination of this figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state available from the State Data Center or other state sources.

³This is the total unduplicated population of those areas in the state that receive library services. The determination of this figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state. The population of unserved areas is not included in this figure.

⁴This is the most recent total population figure for the state that matches the local population figures that are submitted to IMLS. The state data coordinator for the state library agency is instructed to obtain the figure annually from the State Data Center or other state sources.

⁵Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame.

⁶Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: A state's total population of legal service area may be larger than the state's total unduplicated population of legal service area or the state population estimate because some public libraries have overlapping service areas. Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

† Not applicable.

Rounds to zero.

¹The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives revenue, plus any areas served under contract for which the library is the primary service provider.

²Response rate is calculated as the number of libraries that reported population of legal service area, divided by the total number of libraries in the survey frame.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹The administrative structure identifies an autonomous library entity (administrative entity) that has its own governance and funding.

²An administrative entity that serves the public directly with one central library, books-by-mail only, or one bookmobile.

³An administrative entity that serves the public directly with two or more service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail only.

⁴An administrative entity that serves the public directly with two or more service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail only. The administrative offices are separate from the direct service outlets and do not provide direct library services.

⁵Response rate is calculated as the number of libraries that reported administrative structure, divided by the total number of libraries in the survey frame.

⁶Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

¹A bookmobile is a traveling branch library. It consists of at least one of the following: (1) A truck or van that carries an organized collection of library materials; (2) paid staff; and (3) regularly scheduled hours (bookmobile stops) for being open to the public.

²Total stationary outlets is the sum of central and branch libraries.

³Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition. Of the 9,091 public libraries in the 50 States and DC, 7,377 were single-outlet libraries and 1,714 were multiple-outlet libraries. Single-outlet libraries are a central library, bookmobile, or books-by-mail-only outlet. Multiple-outlet libraries have two or more direct service outlets, including some combination of one central library, branch(es), bookmobile(s), and/or books-by-mail-only outlets.

NOTE: Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 3A. Number of public libraries in the 50 states and the District of Columbia, with branches and bookmobiles, and number of service outlets, by type of outlet and population of legal service area: Fiscal year 2013

Population of legal service area	Number of public libraries	Number of libraries with		Number of outlets			
		Branches	Book-mobiles ¹	Stationary outlets			Book-mobiles ¹
				Total ²	Central libraries	Branches	
Total ³	9,091	1,540	556	16,545	8,905	7,640	669

¹Type of legal basis refers to the type of local government structure within which the library functions.

²An organized local government authorized in a state's constitution and statutes and established to provide general government for a specific concentration of population in a defined area.

³An organized local government authorized in a state's constitution and statutes and established to provide general government.

⁴A multi-jurisdictional entity that is operated jointly by a county and a city.

⁵A public library that is operated jointly by two or more units of local government under an intergovernmental agreement.

⁶A public library that is privately controlled but meets the statutory definition of a public library in a given state.

⁷A public library that is under the legal basis of a school district.

⁸A local entity other than a county, municipality, township, or school district that is authorized by state law to establish and operate a public library.

⁹This includes libraries under the legal basis of Native American Tribal Government and combined public/school libraries.

¹⁰Response rate is calculated as the number of libraries that reported type of legal basis, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed. Data were not imputed for the outlying areas.

¹¹Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 5A. Percentage distribution of public libraries in the 50 states and the District of Columbia, by type of legal basis and population of legal service area: Fiscal year 2013

Population of legal service area	Number of public libraries	Type of legal basis ¹							
		Municipal government ²	County/parish ³	City/country ⁴	Multi-jurisdictional ⁵	Nonprofit association or agency libraries ⁶	School district ⁷	Library district ⁸	Other ⁹
Percentage distribution									
Total ¹⁰	9,091	53.0	10.0	1.0	3.3	14.1	1.9	15.2	1.5
1,000,000 or more	29	24.1	41.4	0	6.9	10.3	0	13.8	3.4
500,000 to 999,999	56	21.4	50.0	8.9	5.4	1.8	0	10.7	1.8
250,000 to 499,999	111	18.0	46.8	1.8	16.2	2.7	0.9	13.5	0
100,000 to 249,999	372	36.0	31.2	2.4	13.4	4.0	0.8	11.3	0.8
50,000 to 99,999	564	41.3	20.9	2.8	8.9	7.1	2.0	15.8	1.2
25,000 to 49,999	976	38.4	17.6	1.4	5.3	12.0	2.2	21.5	1.5
10,000 to 24,999	1,753	46.5	11.0	1.1	2.0	14.1	2.9	21.0	1.4
5,000 to 9,999	1,501	50.7	6.8	0.7	1.7	18.7	3.6	16.5	1.3
2,500 to 4,999	1,254	57.5	4.4	0.6	1.4	18.3	1.8	14.1	1.8
1,000 to 2,499	1,487	64.8	3.4	0.5	1.9	15.7	0.7	11.8	1.2
Less than 1,000	988	78.2	1.3	0	2.2	10.9	0.4	4.7	2.2

¹Type of legal basis refers to the type of local government structure within which the library functions.

²An organized local government authorized in a state's constitution and statutes and established to provide general government for a specific concentration of population in a defined area.

³An organized local government authorized in a state's constitution and statutes and established to provide general government.

⁴A multi-jurisdictional entity that is operated jointly by a county and a city.

⁵A public library that is operated jointly by two or more units of local government under an intergovernmental agreement.

⁶A public library that is privately controlled but meets the statutory definition of a public library in a given state.

⁷A public library that is under the legal basis of a school district.

⁸A local entity other than a county, municipality, township, or school district that is authorized by state law to establish and operate a public library.

⁹This includes libraries under the legal basis of Native American Tribal Government and combined public/school libraries.

¹⁰Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. The response rates are included in Table 5. Data were not imputed for outlying areas.

¹The types of geographic service areas (Municipal government, County/parish, Metropolitan area, etc.) are from U.S. Census Bureau geography. Public libraries identified the geographic service area type that either exactly or most nearly

described the geographic area for which the public library was established to offer services and from which (or on behalf of which) the library derives income, and any areas under contract for which the library is the primary service provider.

²Response rate is calculated as the number of libraries that reported geographic service area, divided by the total number of libraries in the survey frame. For item(s) with response rate below 100 percent, data for nonrespondents were imputed. Data was not imputed for outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹The library or entity that provides the physical space and staff who manage, coordinate, or administer the programs of the federation or cooperative.

²An autonomous library joined by formal or informal agreement(s) with (a) other autonomous libraries in the same state to perform various services cooperatively, such as resource sharing, communications, etc. and (b) libraries that are part of national, multi-state or statewide library federations or cooperatives. This excludes the Online Computer Library Center (OCLC) system; multiple-outlet administrative entities (e.g., libraries with branches that have the word “system” in their legal name) if the entity does not have an agreement with another autonomous library; and libraries that serve as the headquarters of a federation or cooperative.

³Response rate is calculated as the number of libraries that reported interlibrary relationship, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed. Data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

Guam	1	99	0.6	100.0	46	0.3	100.0	29	62.8	100.0	59	0.4	100.0

¹Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state.

²Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 8A. Number of public library services and library services per capita in the 50 states and the District of Columbia, by type of service and population of legal service area: Fiscal year 2013

Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 9A. Number of interlibrary loans provided to and received from per 1,000 population in the 50 states and the District of Columbia, by type of service and population of legal service area: Fiscal year 2013

Population of legal service area	Number of public libraries	Interlibrary loans provided to		Interlibrary loans received from	
		Total (in thousands)	Per 1,000 population ¹	Total (in thousands)	Per 1,000 population ¹
Total ²	9,091	70,677	231.9	70,568	231.5
1,000,000 or more	29	578	11.2	679	13.2
500,000 to 999,999	56	1,728	42.1	2,215	54.0
250,000 to 499,999	111	4,643	119.9	4,457	115.1
100,000 to 249,999	372	7,887	139.4	8,174	144.5
50,000 to 99,999	564	11,099	289.0	11,041	287.5
25,000 to 49,999	976	15,028	450.8	15,363	460.9
10,000 to 24,999	1,753	17,265	632.8	16,854	617.7
5,000 to 9,999	1,501	7,675	732.5	7,323	698.9
2,500 to 4,999	1,254	3,060	689.7	2,916	657.2
1,000 to 2,499	1,487	1,390	574.4	1,265	522.8
Less than 1,000	988	323	591.5	280	512.2

¹Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state.

²Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in Table 9. Data were not imputed for the outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response

rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

²Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 10A. Total, children's and young adult programs in public libraries in the 50 states and the District of Columbia, by type of service and population of legal service area: Fiscal year 2013

Population of legal service area	Number of public libraries	Total programs	Children's programs		Young adult programs	
			Total	Percentage of total programs	Total	Percentage of total programs
Total ¹	9,091	4,271,629	2,514,325	58.9	384,017	9.0

Guam	1	15	93.1	100.0	10	65.6	100.0	4	25.1	100.0

¹Per 1,000 population are based on the total unduplicated population of legal service areas.

²Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 11A. Total, children's and young adult program attendance in public libraries in the 50 states and the District of Columbia, by population of legal service area: Fiscal year 2013

Population of legal service area	Number of public libraries	Total program attendance		Children's program attendance		Young adult program attendance	
		Total (in thous.)	Per 1,000 population ¹	Total (in thous.)	Per 1,000 population ¹	Total (in thous.)	Per 1,000 population ¹

¹These materials include books in print.

²Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state.

³Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 13A. Number of public library materials and library materials per capita or per 1,000 population in the 50 states and the District of Columbia, by type of material and population of legal service area: Fiscal year 2013

1,000 to 2,499	1,487	22,053	9.1	41	17.1
Less than 1,000	988	9,379	17.2	18	32.6

¹These materials include books in print.

²Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in Table 13. Data were not imputed for the outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹These materials include books in print.

²Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Less than 1,000	988	223	0.4	660	1,208.0

¹Per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state.

²Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were

imputed and are included in the table. The response rates are included in Table 15. Data were not imputed for the outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹The average was calculated by dividing the total number of materials of each type by the total number of public libraries.

²Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 16A. Average and median number of downloadable materials in public libraries in the 50 states and the District of Columbia, by type of material and population of legal service area: Fiscal year 2013

¹The average was calculated by dividing the total number of materials of each type by the total number of public libraries.

²Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 17A. Total, average, and median number of electronic materials in public libraries in the 50 states and the District of Columbia, by type of material and population of legal service area: Fiscal year 2013

³Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 18A. Total licensed databases in public libraries and percentage distribution of databases in the 50 states and the District of Columbia, by source of databases and population of legal service area: Fiscal year 2013

Population of legal service area	Number of public libraries	Total licensed databases

Wyoming	23	465.5	100.0	180.1	100.0	59.2	100.0	285.4	100.0	32.9	12.7	15
Outlying areas												
American Samoa	1	11.0	100.0	8.0	100.0	1.0	100.0	3.0	100.0	12.5	9.1	1
Guam	1	21.0	100.0	0	100.0	0	100.0	21.0	100.0	0	0	0

¹Paid staff were reported in FTEs. To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs). FTE data were reported to two decimal places but rounded to one decimal place in the table. Paid staff is one of four criteria used in the Public Libraries Survey to define a public library. Some states report public libraries that do not have paid staff but meet the definition of a public library under state law.

²“ALA-MLS”: A Master's degree from a graduate library education program accredited by the American Library Association (ALA). Librarians with an “ALA-MLS” are also included in total librarians.

³Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

⁵The number of “certified” librarians was reported in the Librarians with “ALA-MLS” column, as the state does not distinguish between Master's degrees from programs of library and information studies accredited by the American Library Association (ALA) and all other Master's degrees in library science awarded by institutions of higher education. Nationally, 7727 Master's degrees in library science were awarded by institutions of higher education in 2010-11 (Digest of Education Statistics, 2012, [NCES 2014015], Table 314. U.S. Department of Education, National Center for Education Statistics. Washington, DC: Government Printing Office.)

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 19A. Number of paid full-time-equivalent (FTE) staff in public libraries, by type of position; percentage of total librarians and total staff with “ALA-MLS” degrees, and number of public libraries with “ALA-MLS” librarians in the 50 states and the District of Columbia by population of legal service area: Fiscal year 2013

¹Paid staff were reported in FTEs. To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs). FTE data were reported to two decimal places but rounded to one decimal place in the table. Paid staff is one of four criteria used in the Public Libraries Survey to define a public library. Some states report public libraries that do not have paid staff but meet the definition of a public library under state law.

²“ALA-MLS”: A Master's degree from a graduate library education program accredited by the American Library Association. Librarians with an “ALA-MLS” are also included in total librarians.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in Table 19. Data were not imputed for the outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹Paid staff were reported in FTEs. To ensure comparable data, 40 hours was set as the measure of full-time employment (for example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs). FTE data were reported to two decimal places but rounded to one decimal place in the table. Paid staff is one of four criteria used in the Public Libraries Survey to define a public library. Some states report public libraries that do not have paid staff but meet the definition of a public library under state law.

²Response rate is calculated as the number of libraries that reported total paid FTE staff, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Rounds to zero.

¹This includes federal funds, such as Library Services and Technology Act (LSTA) funds, that are distributed to public libraries through state library agencies. Other federal funds that are used by state library agencies or library cooperatives to provide services that benefit local public libraries are not included in the table because they are not received as income by public libraries.

²This includes monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants.

³Response rate is calculated as the number of libraries that reported total income and/or all four sources of income, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹Per capita is based on the total unduplicated population of legal service areas.

²Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 23A. Percentage distribution of public libraries in the 50 states and the District of Columbia, by per capita operating revenue from local sources and population of legal service area: Fiscal year 2013

Population of legal service area	Number of public libraries	Per capita operating revenue ¹ from local sources									
		\$0 to \$0.99	\$1 to \$2.99	\$3 to \$4.99	\$5 to \$6.99	\$7 to \$8.99	\$9 to \$11.99	\$12 to \$14.99	\$15 to \$19.99	\$20 to \$29.99	\$30 or more

American Samoa	1	494	63.0	10.9	26.1	100.0
Guam	1	939	92.0	5.1	2.9	100.0

¹This includes all expenditures other than those for staff and collection, such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs of computer hardware and software used to support library operations or to link to external networks, including the Internet. Includes expenditures for contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.

²Response rate is calculated as the number of libraries that reported total operating expenditures and/or all three types of expenditures, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

Guam	1	5.89	100.0	5.42	100.0	0.30	100.0	0.17	100.0

¹Per capita is based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state.

²This includes all expenditures other than those for staff and collection, such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs of computer hardware and software used to support library operations or to link to external networks, including the Internet. Includes expenditures for contracts for services, such as costs of operating and maintaining physical facilities, and fees paid to a consultant, auditor, architect, attorney, etc.

³Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 25A. Total per capita operating expenditures of public libraries in the 50 states and the District of Columbia, by type of expenditure and population of legal service area: Fiscal year 2013

¹This includes all operating expenditures for electronic (digital) materials. Types of electronic materials include e-books, e-serials (including journals), government documents, databases (including locally mounted, full text or not), electronic files, reference tools, scores, maps, or pictures in electronic or digital format, including materials digitized by the library. Electronic materials can be distributed on magnetic tape, diskettes, computer software, CD-ROM, or other portable digital carrier, and can be accessed via a computer, via access to the Internet, or by using an e-book reader. This includes expenditures for materials held locally and for remote electronic materials for which permanent or temporary access rights have been acquired. It also includes expenditures for database licenses.

²This includes all operating expenditures for other materials, such as microform, audio, video, DVD, and materials in new formats.

³Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹Response rate is calculated as the number of libraries that reported total operating expenditures, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

²Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 27A. Percentage distribution of public libraries in the 50 states and the District of Columbia, by total operating expenditures and population of legal service area: Fiscal year 2013

¹Per capita is based on the total unduplicated population of legal service areas.

²Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in Table 28. Missing data were not imputed for the outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Rounds to zero.

¹This includes federal funds, such as Library Services and Technology Act (LSTA) funds, that are distributed to public libraries through state library agencies. Other federal funds that are used by state library agencies or library cooperatives to provide services that benefit local public libraries are not included in the table because they are not received as income by public libraries.

²This includes monetary gifts and donations received in the current year, interest, library fines, fees for library services, or grants.

³Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 29A. Total capital revenue of public libraries and percentage distribution of revenue in the 50 states and the District of Columbia, by source of revenue and population of legal service area: Fiscal year 2013

For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

²Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 30A. Total capital revenue of public libraries in the 50 states and the District of Columbia and percentage distribution of public libraries, by total capital revenue category and population of legal service area: Fiscal year 2013

Population of legal service area	Number of public libraries	Total capital revenue (in thousands)	Total capital revenue					
			\$0	\$4,999	\$9,999	\$49,999	\$99,999	\$100,000 or more
			Percentage distribution					
Total ¹	9,091	\$1,020,122	70.9	7.3	3.1	8.3	3.0	7.3
1,000,000 or more	29	92,955	44.8	0	0	6.9	3.4	44.8
500,000 to 999,999	56	150,439	39.3	0	0	5.4	1.8	53.6

¹Response rate is calculated as the number of libraries that reported total capital expenditures, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Missing data were not imputed for the outlying areas.

²Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 31A. Total capital expenditures of public libraries in the 50 states and the District of Columbia and percentage distribution of public libraries by total capital expenditures and population of legal service area: Fiscal year 2013

Population of legal service area	Number of public libraries	Total capital expenditures (in thousands)	Total capital expenditures					
			\$0	\$0.01 to \$4,999	\$5,000 to \$9,999	\$10,000 to \$49,999	\$50,000 to \$99,999	\$100,000 or more
			Percentage distribution

† Not applicable.

¹This is the total number of single-outlet public libraries (centrals) on the public library outlet data file. Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

²The response rate is the total number of single-outlet public libraries (centrals) on the public library outlet data file divided by the number of single-outlet public libraries (centrals) on the public library data file.

³The average square footage is calculated by dividing the total square footage reported by single-outlet public libraries (centrals) by the total number of such outlets reporting the data.

⁴Per 1,000 population data are based on the total unduplicated population of legal service areas. Only single-outlet public libraries (centrals) that reported square footage are included.

⁵The square footage response rate is calculated by dividing the total number of single-outlet public libraries (centrals) reporting square footage by the total number of single-outlet public libraries (centrals) on the public library outlet data file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only outlets), and missing data are not imputed. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands).

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

† Not applicable.

¹This is the total number of single-outlet public libraries (centrals) on the public library outlet data file. Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

²The average square footage is calculated by dividing the total square footage reported by single-outlet public libraries (centrals) by the total number of such outlets reporting the data.

³Per 1,000 population data are based on the total unduplicated population of legal service areas. Only single-outlet public libraries (centrals) that reported square footage are included.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only outlets), and missing data are not imputed. The response rates are included in Table 32.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹This is the total number of multiple-outlet public libraries on the public library outlet data file (multiple outlets consisting of bookmobiles only are excluded). Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

²The response rate is the number of multiple-outlet public libraries on the public library outlet data file divided by the number of multiple-outlet public libraries on the public library data file.

³The average square footage is calculated by dividing the total square footage reported by multiple-outlet public libraries (centrals or branches) by the total number of such outlets reporting the data.

⁴Per 1,000 population data are based on the total unduplicated population of legal service areas. Only multiple-outlet public libraries that reported square footage for their central outlets are included in the "Per 1,000 population" figure for centrals. Only multiple-outlet public libraries that reported square footage for all of their branch outlets are included in the "Per 1,000 population" figure for branches.

⁵The square footage response rate is calculated by dividing the number of multiple-outlet libraries (centrals or branches) reporting square footage by the number of such outlets on the public library outlet data file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only-outlets), and missing data are not imputed. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands).

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error.

Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

— Not available.

† Not applicable.

¹This is the total number of central outlets on the public library outlet data file. Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

²The response rate is the number of central outlets on the public library outlet data file divided by the number of centrals on the public library data file.

³The average square footage of central outlets is calculated by dividing the total square footage reported by central outlets by the total number of such outlets reporting the data.

⁴The square footage response rate is calculated by dividing the total number of central outlets reporting square footage by the total number of such outlets on the public library outlet file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail only-outlets), and missing data are not imputed. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands).

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

† Not applicable.

¹This is the total number of branch outlets on the public library outlet data file. Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

²The response rate is the number of branch outlets on the public library outlet data file divided by the number of branches on the public library data file.

³The average square footage of branch outlets is calculated by dividing the total square footage reported by branch outlets by the total number of such outlets reporting the data.

⁴The square footage response rate is calculated by dividing the total number of branch outlets reporting square footage by the total number of such outlets on the public library outlet data file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only outlets), and missing data are not imputed. Data were not reported by the following outlying areas (Northern Marianas and Virgin Islands).

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2013. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.
